

# MORE THAN ONE WAY TO SHOOT A WHITETAIL

## OUT OF THE DARKNESS

THE MYSTERY AND MAJESTY OF GOD'S CREATION

Great as a gift for someone you love!

CODY CARLSON

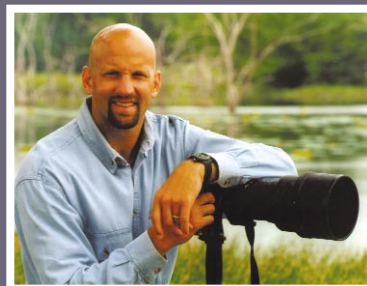

Beautiful photography, stirring drama, a profound message . . . and a smile or two. Cody Carlson combines all of these elements in *Out of the Darkness*. His appreciation for God's creation has sharpened his eye for the beautiful and the unusual in nature, and his love for God enables him to reflect on the messages nature can teach us about ourselves and our Creator.

*During the rut, bucks fight to gain dominance over each other to insure their proper place in the mating season. Hunters eagerly anticipate this period when normally timid bucks throw caution to the wind. My friend Milo worked on a ranch for many years. When he whistled, the deer came out of the cover of thick brush to eat the corn he offered them. Their natural instinct to fight or flee was overcome by the trust Milo established with them over those years.*

*Maybe that's the same thing that happens between us and God. By his patient and persistent love, he overcomes our natural instincts to fight or flee, and we respond in faith and thankfulness.*
